It ranges from golden yellow and orange to reddish and even greenish hues. **Characteristics** Color Spectrum: Amber varies from transparent golden hues to opaque browns and reds. Inclusions: Often contains trapped ancient organic material like insects or plant matter, adding intrigue. Texture: Usually smooth and warm to the touch, with a resinous luster. **Uses in Jewelry** Pendants and necklaces Earrings and brooches Beads and charms **Ethical and Conservation Considerations** While natural amber is relatively sustainable, concerns exist about illegal harvesting and the environmental impact of extraction. Always opt for ethically sourced amber. **Coral** What Is Coral? Coral is an organic material derived from marine invertebrates? coral polyps? that secrete calcium carbonate skeletons. It forms vibrant, durable structures in ocean reefs. **Characteristics** Color Range: Bright reds, pinks, oranges, whites, and sometimes black. Texture: Usually smooth, with some varieties featuring natural ridges or branching structures. Durability: Moderate; needs careful handling to prevent cracking. **Uses in Jewelry** Necklaces and pendants Bracelets and bangles Earrings and rings **Ethical and Environmental Impact** Coral harvesting has led to significant reef degradation and species decline. Sustainable and ethically sourced coral options, such as farmed coral, are increasingly available, promoting conservation efforts. **Horn** What Is Horn? Horn jewelry is made from animal horn? commonly buffalo, cow, or other bovine species. It's a versatile material that can be carved, polished, and dyed. **Characteristics** Colors: Varies from black, brown, to creamy white, often with natural striations. Raw Materials: The Fruits and Base Spirit

At the heart of Dix de Der are select fruits, which are usually local or regional varieties known for their aromatic qualities. Common fruits used include: Cherries, Raspberries, Blackcurrants, Pears, Apples. The choice of fruits significantly influences the flavor and aroma profile of the final product. The base spirit is typically a neutral grain alcohol or a high-quality grape brandy, serving as a blank canvas that absorbs the essence of the fruits during maceration.

Maceration and Infusion

The production process involves steeping the selected fruits in the alcohol for an extended period, often several weeks to months. This maceration process allows the spirits to extract the aromatic oils, sugars, and pigments from the fruits, resulting in vibrant colors and complex flavors.
